

Public Interest Incorporated Foundation Solaputi Kids Camp

Activity Performance Report for the Fiscal Year 2019 (Thank You for Your Support.)

In the fiscal year 2019, we provided nine camp programs (seven in summer and two in winter) and invited children with serious illnesses and their families to our campground with on-site medical care in Hokkaido for free from all over the country. The campers spent precious time with their friends and families in nature and went back home with the strength to live for tomorrow. (The annual number of participants was 240 including 73 children with serious illnesses.) We are grateful for your support.

[Voice from a Mother Who Participated with Her Family]

○ The whole family, my child with serious illness, the siblings, my husband and I, could enjoy the program. A few years ago, I never imagined that such a day would come. I am happy that we had been doing our best and got where we are now.

Solaputi Kids Camp 2020 Camp Plan (Summary)

We will establish our business plans for the fiscal year 2020 watching closely on the situation of COVID-19 across the world, Japan, and Hokkaido taking into consideration that preventing the spread of infection is the highest priority. (Specifically, we have developed policies as follows.)

■ Cancellation, Postponement, and Change of Camp Programs

- All planned camps have been cancelled in principle. (Nine camps with four different types in summer and winter)
- We will proceed the preparation for the scheduled A Day Camp for Only One Family focusing on horse activities.

↑We will invite families (ONE family a day) and recruit volunteers (ONE volunteer a day) from our neighboring area.

※ If conditions permit, we will proceed the day camp program.

■ Infection Prevention and Control for COVID-19 on the Campsite

We will collect the latest information from all over the world, make a manual to prevent the infection spread of COVID-19, and urge the staff and camp attendees to follow through with the manual completely.

[Preparation for the Horse Activities (during training)]

■ Follow-up Care and Others for Former Campers

We will contact with former campers who have difficulty going out under such circumstances and ask them about their situations online for a change of pace and conduct our research on the effectiveness of camp.

We will make every effort to prevent this global COVID-19 crisis. We appreciate your continued support.
